The project ***Future skills for Youth*** aims to improve the competencies of youth leaders and youth workers in **Mindfulness, Embodiment** and **Coaching** methods as non-formal education methods to increase mental health and wellbeing, but also social dialogue and a sense of belonging among youth. In the course of globalization and migration, societies become more diverse, which often causes conflict, tension or even radicalization.

**Mindfulness** and **Embodiment** are two strong pathways towards greater self-awareness, inner peace and a sense of belonging. Both include a wide variety of methods and tools, which can be applied in youth work and non-formal education. Moreover, these tools can be applied in community-building processes and social dialogue among youth.

**Coaching** is a relatively new element in supporting youth work. These training courses have been developed with the aim of offering practical support for youth leaders and youth workers that are actively supporting different Youth Initiatives in their communities.

The Project as a whole aim to empower youth leaders and youth worker's personal development and Leadership capacity by fostering their skills for self-reflection and self-awareness, by using mindfulness and embodiment as pathways.

Project Future skills for Youth includes **two Training Courses**.

The **first Training Course** will take place in a seminar center located in the city of Kobuleti, Georgia, between **5. – 13. September 2021. (5th and 13<sup>th</sup> are travel days)**

The first course encourages youth worker's and young leaders' personal development through an experience of Embodiment, Mindfulness and coaching methods with a specific focus on Community-building and communication skills. It transfers methodological knowledge, which allows participants to apply these innovative non-formal education tools in an informed and professional way.

**The second training course** will take place in town Košice, Slovakia, in October or in November 2021.

The second training offers participants the opportunity to directly transfer their new knowledge and personal experience into practice. Participants will plan and facilitate sessions including tools from the field of Mindfulness and Embodiment for community building and wellbeing of youth.

Both Training Courses will be attended by 24 participants from Armenia, Georgia, Azerbaijan, Slovakia, Poland, Czechia.

[It is required that selected participants attend both Training Courses.](#)
